Selecting & building
the right model for our
project (2051 RE)

Technical Approach:

- ❖ Data cleaning (checked the missing values | data types ...)
- ❖ Understanding the data (Features , visualization ...)
- ❖ Identify and Selecting Features which has most effect on the price
- ❖ Feature Engineering (Preparing the data for analysis using dummies...)
- ❖ Model with data (linear regression, Lasso, Ridge)
- ❖ Evaluate models
- ❖ Select the best model
- ❖ Test the model with our test data
- ❖ Present the final model
